

Patron's Message

I am grateful to almighty and my Parents for giving an opportunity to serve the downtrodden poor people of the society in health sector through a Charitable Hospital having world Class Infrastructure and all types of Medical facilities, at almost negligible costs to the patients.

T.S.Misra Hospital and Medical College and Dr. Shakuntala Misra Blood Bank equipped with latest machines and expert technicians and Doctors have been established in the name of my Late beloved father and mother with the sole objective to achieve the above objects as both of them throughout their life had struggled and worked for the upliftment of the have-nots of the society.

I am happy to note that the entire management, staff are working day and night to fulfill the above dreams and to ensure that the best of facilities are available not only in the Hospital but also in the College and its Hostels so that the students studying Medicine in this college get the best of opportunity to become one of the best Doctor's and for this the management has ensured to have the best and most experienced faculty members so that the students get the best possible education from them.

I wish all the success to the management, staff, faculty and all doctors working in the Hospital and hope they will very soon achieve their aim to see that this college develops further and becomes a University of its own.
